

## Offres de partenariat dans l'énergie

### Offres en date du 20 février 2012

- [Inexpensive Solid Store for Hydrogen - Lower-cost Source Material for Producing Nanocomposite](#)
- [Mobile stand alone photovoltaic systems \(up to 26 kw\)](#)
- [Expertise required in DC control for wind turbine energy generation](#)
- [Manufacture of photovoltaic panels](#)
- [PS: CIP \(IEE\) - aweOsme: Dissemination of technologies and measures for energy saving and energy efficiency in SMEs](#)

### Offres en date du 14 février 2012

- [Engine Lubrication System Cleaning Technology](#)
- [Innovative software based tool for online monitoring and management of energy usage](#)
- [Launching mass production of light-emitting diode \(LED\) streetlights](#)
- [Novel drive system for brushless DC \(direct current\) motor](#)
- [Photovoltaic Multi Joint Box Control and Monitoring System](#)
- [Colour management technologies for LED lighting](#)
- [Development and manufacture of new Photovoltaic \(solar energy\) systems ; Hybridation with micro turbines](#)
- [High Performance and High Durability Thermal Insulation Coating](#)
- [High-temperature proof filters](#)
- [Understanding Metal Deposition in Combustion Environments](#)

### Offres en date du 6 février 2012

- [Control and visualisation technologies for optimum operation of biogas plants](#)
- [Open source advanced metering infrastructure for smart grids](#)
- [Active ventilation system to improve air quality of buildings](#)
- [Heat, cold and/or electricity storage technology](#)
- [Small scale solar concentrator power \(heat and/or electricity\) plant](#)
